RE: ALVES DE ARAUJO, THIAGO
DOB: 10/03/83

Dear Dr. Wulkan,

Thiago, underwent a follow up angiogram for his dural fistula. I am pleased to inform you that the fistula is completely obliterated.

At this point, I think that Thiago is able to do physical activity without restrictions.

Thank you for letting us assist in the management of this young man.

Sincerely yours,

Alex Berenstein, M.D.
Yasunari Niimi, M.D.
Rafael Ortiz, M.D.
Johanna Fifi, M.D.
